Notes + Important Disclosures

⁸ Duration measures the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years. Rising interest rates mean falling bond prices, while declining interest rates mean rising bond prices.

⁹ Average Bond Price: \$93.81

¹⁰ The fund itself has not been rated by an independent rating agency. Ratings (other than U.S. Treasury securities or securities issued or backed by U.S. agencies) provided

by Nationally Recognized Statistical Rating Organizations (NRSRO's) including Standard & Poor's, Moody's, Fitch, Kroll, Morningstar DBRS, A.M. Best, and Egan-Jones. This breakdown is not an S&P credit rating or an opinion of S&P as to the creditworthiness of such portfolio. This breakdown is provided by Yorktown Management & Research. When calculating the credit quality breakdown, the manager selects the middle rating when three or more rating agencies rate a security. When two agencies rate a security, the higher of the two ratings is used, and one rating is used if that is all that is

provided. A rating of BB and below would represent below investment-grade. Ratings apply to the credit worthiness of the issuers of the underlying securities and not the fund or its shares. Ratings may be subject to change.

A Fund's direct or indirect investments in foreign securities, including depositary receipts, involve risks not associated with investing in U.S. securities that can adversely affect the Fund's performance. Foreign markets, particularly emerging markets, may be less liquid, more volatile and subject to less government supervision than domestic markets.

Notes + Important Disclosures

You should carefully consider the investment objectives, potential risks, management fees, and charges and expenses of the Fund before investing. The Fund's prospectus contains this and other information about the Fund, and should be read carefully before investing. You may obtain a current copy of the fund's prospectus by calling 1-800-544-6060.

The ICE BofA U.S. Corporate & Government, 1-3 Years Index covers the U.S. investment grade debt publicly issued in the U.S. domestic market, including U.S. Treasury, U.S. agency, foreign government, supranational and corporate securities, with a remaining term to final maturity less than 3 years. Investors cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges.

Per the most current prospectus, (1) Fund total operating expense ratios are: Class A, 0.87%; Class L, 1.52%; Institutional Class, 0.87% until at least May 31, 2023. (2) In addition, the Adviser has entered into contractual expense limitation agreement with the Trust so that the Fund's ratio of total annual operating expenses are limited to 0.84% for Class A Shares and Institutional Class shares and 1.49% for Class L Shares until at least May 31, 2023.

The Morningstar Rating for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life sub accounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing

Morningstar™ Rating as of 3/31/23

Morningstar ratings are based on risk-adjusted returns and do not take into account the effect of sales charges and loads. © 2023 Morningstar, Inc. All Rights Reserved. The information contained: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Ratings displayed with hollow stars represent Morningstar Extended Performance Ratings. Morningstar provides adjusted historical returns and an Extended Performance Rating for some mutual fund share classes that don't have a 1-, 3-, 5-, or 10-year performance history. These hypothetical Morningstar Ratings are based on the historical performance of the oldest share class of the fund, adjusted for fees and expenses.

more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall

star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Diversification does not ensure a profit or guarantee against loss.

Investing involves risk, including loss of principal. There is no guarantee that this, or any, investment strategy will succeed. Fixed income investments are affected by a number of risks, including fluctuation in interest rates, credit risk, and prepayment risk. In general, as prevailing interest rates rise, fixed income securities prices will fall.
